

A BETTER WAY TO LAUNCH

Your launch video shouldn't explain your product.

Give people a reason to care.

The same launch. On repeat.

01 Explain the product

02 Walk through the features

03 Show the interface

04 Explain how it works

Plenty of information. No reason to care.

Existence doesn't create interest.

People care when they recognize a problem they want solved. Start with the frustration in their world.

Sell the problem first.

01 Show the frustration customers live with

02 Show life when that problem is solved

03 Show why this product needed to exist

The product becomes interesting when its impact becomes clear.

Two assets. Two different jobs.

EXPLAINS

Product demo

Explains the mechanics: features, screens and workflows.

CREATES DESIRE

Launch video

Creates desire and curiosity about the change the product makes.

Give people a reason to take the next step. Let the demo handle the details.

Why does every launch look the same?

01 Dark backgrounds

02 Floating UI

03 Feature lists

04 Dramatic music

Different products, founders and problems. The same creative direction.

THE FRAMEWORK

Let your story shape the launch.

01 The problem you're solving

02 The people you're solving it for

03 The founder's reason for building it

04 The change you want to create

THE TAKEAWAY

Create curiosity.

The demo explains how it works. The launch makes people care enough to find out.
